THE MYERS "STAYON" FLEXIBLE DOOR HANGER

PATENTED.

With Steel Roller Bearings, Pushes and Pulls Easily. It is Impossible to Throw it Off the Track, which Entitles it to the Name "STAYON." Aluminum Finish.

Stayon—The hanger is so constructed that when once in position it cannot be thrown off the track, no matter how roughly it is handled. The big A locks over the underside of the steel rail, preventing it from being thrown off. This feature alone will recommend it to all users. Roller Bearings—The wheels revolve on the top of door extending down on each side and bolted through. The material is malleable iron and steel. Flexible—The hanger has a loop joint between the wheel and the top of door, which allows each door to be raised or shoved outward independent of the other, a feature not found on any other door hanger. The door can be held rigid by means of the stay roller when desired. The flexible feature prevents binding when door is warped or side wall of barn is crooked. The Track is heavy special high carbon stiff steel 3-in. x 1-in., supported by a rigid bracket with square shoulder mortised through the track every 17 inches, thus making a very substantial fastening and adding materially to the stiffness of the track. It has more than twice the strength of the ordinary track. An important feature of this track is that it can be reversed—that is, can be placed with either side up which is a great convenience in many places, as it often occurs that the building is not suited to place track as regularly intended.

A YOUNG LADY'S LIFE SAVED

At Panama, Colombia, by Chamberlain's Colic, Cholera and Diarrhoea Remedy. Dr. Chas. H. Utter, a prominent physician, of Panama, in a recent letter states: "Last March I had as a patient a young lady sixteen years of age, who had a very bad attack of dysentery. Everything I prescribed for her proved ineffectual and she was growing worse every hour. Her parents were sure she would die. She had become so weak that she could not turn over in bed. What to do at this critical moment was a study for me, but I thought of Chamberlain's Colic, Cholera and Diarrhoea Remedy and as a last resort prescribed it. The most wonderful result was effected. Within eight hours she was feeling much better; inside of three days she was upon her feet and at the end of one week was entirely well."
